

Week Three Meeting Log

AI Tutor

Spencer Thompson | Landon Towers

9/7/2025

| What have you done since last team meeting?

- We met with the tech management department at UVU again.
- We get a consistent local development environment working, and discussed some new features we wanted to start building.
- We got user metrics data to the tech management department and addressed some billing questions.

| What obstacles are you encountering?

- Time management. Our mental ram is being stretched by a large number of meetings, documents and other classes that need to be done.
- Our team lost a member which was a bit chaotic and tough.

| What do you plan to accomplish by the next team meeting?

- Merge the first pull request.
- Have a solid plan for features to implement.

| Notes

- This week has been particularly chaotic, hopefully the sheer amount of tasks goes down.
